

Representative task logic spans the preclinical pharmacology spine

MoA

Shortcut

Use the drug-class
label

Data-supported

Follow dose-
resolved
signalling

task asks for the defensible pharmacology decision

Target engagement

Shortcut

Keep strongest
apparent protein

Data-supported

Remove
contaminants;
find cluster

task asks for the defensible pharmacology decision

Safety

Shortcut

Apply a generic
blood-marker
threshold

Data-supported

Integrate
pathology,
chemistry,
survival

task asks for the defensible pharmacology decision

PK / exposure

Shortcut

Rank by potency or
total AUC

Data-supported

Compare unbound
coverage
